WASHING MACHINE

Specially recommend

XQG50-Q10DH/J

Intergrative washing spinning and drying

Two drying powers can be chosen. Invariable temperature steam cooling and heating technics are employed. Combined with intelligent balance technic, dynamic drying can be realized with less fold.

XQG50-Q8D/J XQG50-Q10D/J XQG50-Q10DH/J

Extra-large LCD display

100mm extra-large dynamic display panel, provide a interacting platform between human being and machine, perform the digital washing life thoroughly. With plenty of washing information, such as preset time, washing temperature and child lock etc. The washing process can be mastered easily.

Intelligent washing control system

Can meet the demands for washing cotton, fabric and silk etc. Automatically control the water flow. You can adjust different kinds of program and parameter, so as to meet the individual demands.

Intelligent balance control technology

Feel the balance of cloth when spined. Adjust the speed with computer to ensure the spinning.

Jiangsu Chunlian Washing Machine Co., Ltd. is a professional corporation that specializes in designing and manufacturing the washing machine for home appliance. Currently, the company has two washing machine cylinder production lines, two AEA fully-automatic cylinder washing machine performance testing lines, two underground logistics conveying lines, two washing machine production lines, one washing machine housing painting line etc. and has the annual productive capacity of 400,000 washing machines per shift. Since the establishment in 1997, it has invested at high standard combined with high quality and high technology, fully absorbing the advanced experience of the world and pursuing the latest technology and mature craft of washing machine manufacture in the world. First-rate manufacturing technologies and first-rate product testing equipments guarantee the high quality of washing machines. Its products have passed international GS, EMC and CE certifications and the CCC certificate issued by the State Certification Center. Besides, the company has also obtained 12 patents, such as regulation method of two-speed motor and testing method of imbalanced mass.

Top loading drum washing machine

XQG50-D6/C

XQG50-D6/A

XQG50-D8/A
XQG50-D10/A

XQG50-D5/C

Feature

- * Intelligent controlling system
- * Preset washing
- * Heating sterilization & disinfection
- * Half water saving
- * 30 min rapid washing program
- * Multi protection system
- * Stainless in & out bucket
- * Intelligent correcting system
